

# STRONGside Engaged

with AquaPro Technology

Kaindl's StrongSide Engaged collection combines AquaPro Technology for a new generation of water resistance with the look and feel of authentic hardwood. Featuring Embossed in Register (EIR), this flooring technique aligns the texture of the surface with the printed wood design, enhancing realism and delivering a truly natural aesthetic. Constructed with an 8mm HDF core board and a tongue & groove click system, StrongSide Engaged provides protection, durability, and ease of installation, all while embracing a modern design that's perfect for any space.
